Enrollment Forms Start Date

- Providers are able to see the start date they entered on an enrollment form by selecting the child's name under "Enrolled" in the provider portal.

- This will pull up the child information that has student name ID # and program information. Next to the calendar icon and says "Enrolled on _____" Which is the date they selected as the start date. Below that it also says "status last changed on _____" Which is the date the status last changed. Likely from accepted to enrolled.

- REMINDER: All enrollments are to be completed by the provider. LCO's should not be placing children in enrolled status.
